PROFESSIONAL SUMMARY

Dynamic professional skilled in React, Node.js, and JavaScript, with strengths in problem-solving, adaptability, and effective communication. Adept at collaborating with diverse teams and mastering new technologies, including Generative AI, in short timeframes. Committed to delivering quality results and supporting a positive team culture.

EDUCATION

Masai School Bengaluru
Full Stack Web Development
Jun 2023

Sanjivani College Of Engineering, Kopargaon
Bachelor of Engineering (Information Technology)
Jun 2022

SKILLS

Technical Skills: Google Analytics, Postman, RESTful APIs, MongoDB, Express.js, WordPress, Node.js, Java, Responsive Web Design, CSS3, HTML5, Git, Redux, React, JavaScript
Soft Skills: Adaptability, Teamwork, Problem Solving, Effective Communication

EXPERIENCE

Ajackus | *Associate Software Engineer*

Feb 2024 - Jul 2025
- Engineered scalable frontend architectures using ReactJS, Zustand, and Redux for high-impact platforms across government, healthcare, and gaming domains
- Integrated advanced mapping, payment gateway, and API solutions including React Leaflet, Cashfree, and Django for dynamic, real-time user experiences
- Optimized and redesigned large-scale web applications, increasing performance and SEO for sites exceeding 900 dynamically generated pages
- Collaborated cross-functionally with design, content, and backend teams to deliver accessible, modern, and high-performing interfaces deployed on AWS

PROJECTS

PlacePrep | *HTML, SCSS, CSS, JavaScript, Bootstrap, JSON Server*
- Deployed Link : https://place-prep-com.vercel.app/HomePage/index.html
- Github Repo : https://github.com/saurabh-sonvane/PlacePrep.com
- Contributed to the development of an educational website for learning coding topics and languages.
- Implemented user and admin login functionality with email validation for secure access.
- Developed interactive MCQ test features to enhance user learning experience.
- Utilized HTML, SCSS, CSS, JavaScript, and Bootstrap for responsive front-end design.
- Integrated JSON Server for managing and storing test data efficiently.

HoneyStore | *React JS, Redux, CSS, JSON Server, Chakra-UI, JavaScript*
- Deployed Link : https://honeysotre.vercel.app/
- Github Repo : https://github.com/saurabh-sonvane/HoneyStore
- Collaborated with cross-functional teams by integrating user feedback into feature enhancements.
- Communicated project updates and technical challenges effectively to peers and mentors.
- Managed project deadlines and tasks with professionalism, ensuring timely delivery of features.
- Adapted quickly to evolving requirements by implementing new filters and payment options.
- Demonstrated strong attention to detail in designing user interfaces and optimizing user experience.

Trivago-Clone | *HTML, CSS, JSON, JavaScript*
- Deployed Link : https://trivago-clone-s17200.netlify.app/
- Github Repo : https://github.com/saurabh-sonvane/TRIVAGO-CLONE
- Developed a fully functional hotel search and booking platform, mirroring key Trivago features for seamless user experience.
- Implemented intuitive UI using HTML, CSS, and JavaScript, ensuring clear communication of hotel options and user preferences.
- Managed project milestones and deadlines independently, demonstrating strong organizational and time management skills.
- Adapted to new challenges and requirements throughout development, showcasing flexibility and problem-solving abilities.
